

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph 45 on page 16 of the specification as follows:

A software implementation of the above-described embodiment may comprise a series of computer instructions either fixed on a ~~tangible medium~~; CRSM (Computer Readable Storage Medium), ~~such as a computer readable media~~; for example a diskette, a CD-ROM, a ROM memory, or a fixed disk, or transmittable to a computer system ~~via a CRTM (Computer Readable Transmission Medium)~~, ~~for example~~ via a modem or other interface device over a medium. The ~~medium CRTM can~~ either ~~can be~~ a tangible medium, including but not limited to optical or analog communication lines, or may be implemented with wireless techniques, including but not limited to microwave, infrared or other transmission techniques. ~~[[It]]~~ The CRTM may also be the Internet. The series of computer instruction embodies all or part of the functionality previously described herein with respect to the invention. Those skilled in the art will appreciate that such computer instructions can be written in a number of programming languages for use with many computer architectures or operating systems. Further, such instructions may be stored using any memory technology, present or future, including, but not limited to, semiconductor, magnetic, optical or other memory devices, or transmitted using any communications technology, present or future, including but not limited to optical, infrared, microwave, or other transmission technologies. It is contemplated that such a computer program product may be distributed as a removable media with accompanying printed or electronic documentation, e.g., shrink wrapped software, pre-loaded with a computer system, e.g., on system ROM or fixed disk, or distributed from a server or electronic bulletin board over a network, e.g., the Internet or World Wide Web.
